The "Russian edition" part clearly indicates that this phrase is associated with a version or

edition of a text produced in or for the Russian-speaking audience.

The Role of Encoding and Typography in Russian Editions

When dealing with Russian texts, especially those digitized or transferred across platforms, encoding issues are commonplace. Cyrillic characters can sometimes be misrepresented due to incompatible character sets or outdated software handling. This leads to strings like `дд` or `д°` appearing instead of the intended Cyrillic letters. The `дд` `дд` `дд` `дд` `дд` `д°` Russian edition might be an example of such encoding artifacts becoming identifiers for certain editions, especially in older digital archives or fan-made translations.

In publishing, "Russian edition" often signifies that the content has been localized, translated, or adapted specifically for Russian readers. It might also involve unique formatting or typographical choices reflecting Russian language norms, including the use of specific fonts, diacritics, or layout styles.
